

# Engage and Leaving Care Post-18 Process

Case discussion takes place between Engage and Leaving Care Personal Adviser (PA) about worries, request for advice/guidance, or to submit intel.

**Consent to be given from the young person to have discussions**

Case consultation and case note added by Engage manager - outcomes as below

**1**

## **Case opened**

Case to open to the Engage Team with consent from the young person and confirmation they are willing to work with the Engage Team

**2**

## **Case not opened**

Case not to be opened up to the Engage Team

In each instance a management oversight case note will added to the main Protocol work space recording the outcome of the consultation.

An Exploitation assessment will be undertaken with the young person and completed within 15 working days. Engage Young Person's Worker to gain consent from the young person to speak to other involved agencies and obtain health triage from the Engage Nurse.

Joint visit to be considered with Leaving Care PA if appropriate.  
The assessment will be saved in the completed forms on Protocol.

**1**

## **Assessment to close**

Case will be closed down via the CE work space and the involvement ceased by the Engage manager.

**2**

## **Assessment to remain open**

A plan of work to support the young person will be created with the young person and their Leaving Care PA and all sessions will be recorded on Protocol. The Engage plan will be documented within the Exploitation assessment and the Leaving Care PA then needs to update the Pathway Plan for the young person to include this.

If at any point a young person wishes no longer to receive support from Engage, the case will close to the team, but the Leaving Care PA can continue to receive advice, guidance and support from the Engage Team.
